

Ceragan

Established in 1993 Ceragan is fast becoming the leading supplier of wall and floor tiles to the commercial sector in South Africa. Ceragan is proud to be the supplier of choice to many of the country's leading Architects and contractors.

Established in 1993 Ceragran is fast becoming the leading supplier of wall and floor tiles to the commercial sector in South Africa. Ceragran is proud to be the supplier of choice to many of the country's leading Architects and contractors.

We aim to offer a more exclusive range of product, an improved shopping experience for our customers through our showrooms based in Johannesburg, Pretoria and Cape Town, and expert advice on selection, installation and maintenance of all our products which is critical to a professional result.

Our Products

At Ceragran, you can be assured that the tiles we supply are not the same as our competitors, they are sourced from the leading international suppliers and adhere to the strictest EU quality standards. Our buying power ensures that our commercial customers are ensured of the most innovative designs and the finest quality, size, absorbency, strength and grade in every product.

Our Services

Choosing the correct finishes and fittings for a project is a process, a process that takes time and is a substantial project investment. We aim to create an environment and offer a full range of services that ensure peace-of-mind and a successful project.

Although catering predominantly to the commercial sector we offer the same level of service to all our clients from leading contractors and architects to individual homeowners doing a home build or renovation. We have recently included homeowners and private businesses in our clientele list.

Our team of highly trained tile specialist consultants will assist you with:

- Sourcing of the perfect tiling product, matching our tiles to your need
- Selecting the correct product for every application
- Trending and latest technologies
- Advising on sourcing complimentary accessories
- Advising on product maintenance
- Full service process management from order to delivery of your tiles to site on time!

Together with our partners Ohlhorst Africa and OMG we offer full installation services as well as installations of marble and granite, ensuring your installation teams are quality controlled, that you have the correct tiles, the right amount of tiles, and the safety of a professional team on your project. Employing casual labour increases the risk of theft, damages and a badly managed site whereas the Ohlhorst Africa team will ensure the installation process is executed as timeously and cleanly as possible.

Our Showrooms

To offer our customers the selection of choice we have full service showrooms in Pretoria, Johannesburg and Cape Town. Our walk-in showrooms display our full range of products and our highly trained tiles specialists will be on hand to discuss and assist you with all your design and project requirements.

Our Recent Projects

Some of our recent projects include:

- Soccer City
